

**VIETNAM NATIONAL UNIVERSITY
HO CHI MINH CITY
INTERNATIONAL UNIVERSITY**

No.: /QD-IU

Ho Chi Minh City, date month year 2021

DECISION

On the promulgation of the Regulation on undergraduate training
under the credit system at International University,
Vietnam National University Ho Chi Minh City

RECTOR OF INTERNATIONAL UNIVERSITY

Pursuant to Decision No. 260/2003/QD-TTg dated December 5, 2003 of the Prime Minister on the establishment of International University under Vietnam National University Ho Chi Minh City;

Pursuant to Decision No. 867/QD-DHQG dated August 17, 2016 of the Director of Vietnam National University Ho Chi Minh City on the promulgation of the Charter on organization and operation of member universities and directly affiliated faculties;

Pursuant to Decision No. 261/QD-DHQG-TCCB dated April 5, 2010 of the Director of Vietnam National University Ho Chi Minh City on the promulgation of regulations on the exercise of autonomy and accountability for member universities;

Pursuant to the Law on Higher Education dated June 18, 2012; the Law amending and supplementing a number of articles of the Law on Higher Education dated November 19, 2018;

Pursuant to Circular No. 08/2021/TT-BGDDT dated March 18, 2021 of the Minister of Education and Training promulgating the undergraduate training regulation;

Pursuant to Decision No. 262/QD-DHQG dated April 20, 2017 of the Director of Vietnam National University Ho Chi Minh City on the promulgation of the undergraduate training regulation;

Pursuant to Decision No. 422/QD-IU dated May 31, 2020 of the Rector of International University on the promulgation of the undergraduate training regulation under the credit system at International University;

Pursuant to Decision No. 444/QD-IU dated August 14, 2020 of the Rector of International University on assignment of duties to members of the Board of Rectors;

At the proposal of the Head of the Undergraduate Training Office of International University in Report No. 358/TTr-DTDH dated December 3, 2021.

DECIDES

Article 1. To promulgate together with this Decision the Regulation on undergraduate training under the credit system at International University, Vietnam National University Ho Chi Minh City.

Article 2. This Decision takes effect from the date of signing and applies to the 2021 intake onwards, beginning from the academic year 2021-2022.

Article 3. The Head of the Undergraduate Training Office, Heads of units, teaching staff, students and individuals involved in the undergraduate training process are responsible for implementing this Regulation.

Recipients:

PRO-RECTOR

- VNU-HCM (for report);
- Training Board - VNU-HCM (for report);
- Board of Rectors (for report);

Dinh Duc Anh Vu

- Affiliated units (for implementation);
- Filed: Office, UTO.

**VIETNAM NATIONAL UNIVERSITY
HO CHI MINH CITY
INTERNATIONAL UNIVERSITY**

REGULATION

On undergraduate training under the credit system at International University,
Vietnam National University Ho Chi Minh City
(Attached to Decision No. /QD-IU dated month year 2021 of the Rector of International University)

Chapter I

GENERAL PROVISIONS

Article 1. Scope of regulation and subjects of application

1. This Regulation sets out general provisions on the organization and management of undergraduate training, including: Training programs and duration of study; forms and modes of training organization; planning and organization of teaching; assessment of learning outcomes and conferment of degrees; other regulations applicable to students.
2. This Regulation applies to organizations and individuals involved in the training activities of International University (IU). Joint training programs where degrees are conferred by foreign partners may apply this Regulation or the regulations of the degree-conferring partner institution as agreed in the cooperation agreement, provided such regulations do not conflict with this Regulation.
3. List of abbreviations:

IU	International University
VNU-HCM	Vietnam National University Ho Chi Minh City
TF	Teaching Faculty
AC	Academic Counselor
TP	Training Program
PLO	Program Learning Outcomes
SGPA	Semester Grade Point Average
CGPA	Cumulative Grade Point Average
NPD	National Defense and Security Education
PE	Physical Education
Cr	Credit
IP	Internship
GT	Graduation Thesis

Article 2. Training programs and duration of study

1. Credits are used to measure the student's workload. One credit is defined as 15 periods of theoretical instruction; 30-45 periods of practice, laboratory or discussion; 45-90 hours of field internship; 45-60 hours for essays, major assignments, capstone projects, or graduation theses (GT). For theoretical or practical/laboratory courses, students must spend at least 30 hours in personal preparation to absorb one credit. One period equals 50 minutes.
2. A course module is a relatively complete block of knowledge, convenient for students to accumulate during their studies. Most course modules carry 2 to 4 credits, with content arranged to be delivered completely and evenly throughout one semester. The knowledge in each module must correspond to a level of proficiency aligned with the intended year of study and must be structured either as part of a

subject or as a combination of multiple subjects. Each module must be identified by a unique code assigned by the university. There are two types of modules: compulsory modules and elective modules.

a) Compulsory modules contain the core knowledge content of each program and must be accumulated by students;

b) Elective modules contain necessary knowledge content that students may choose according to the university's guidance to diversify their area of specialization, or freely choose to accumulate the required number of modules for each program.

3. A field of study is a collection of specialized knowledge and skills in a particular area of science or professional activity. A field of study, comprising one or more specializations, is governed by a unique code in the Level IV Education and Training Classification for undergraduate education issued by the Ministry of Education and Training.

4. An undergraduate training program expresses the objectives of higher education, specifies standards of knowledge, skills, scope and structure of higher education content, methods and forms of training, and methods for assessing training outcomes for each module, field of study, and level of higher education.

a) Training programs are structured in credit units, consisting of modules, which must include all compulsory modules and meet the program standards as prescribed by the Ministry of Education and Training. In the case of double-major or major-minor programs, the training program must clearly show the common and separate workloads for each field.

b) The objectives of the training program are clearly defined, consistent with the mission and vision of IU, and aligned with the objectives of higher education stipulated in the Law on Higher Education.

5. Program Learning Outcomes (PLO) are the required attainments in terms of qualities and competencies of learners upon completion of a training program, including minimum requirements for knowledge, skills, level of autonomy and responsibility of graduates. PLOs must satisfy the following conditions:

a) Must be clear and practical, reflecting the learning outcomes that graduates need to achieve in terms of general understanding and core competencies at the training level, as well as specific requirements of the field and discipline.

b) Must be measurable and assessable at various cognitive levels, serving as the basis for designing, implementing and improving content and teaching methods; examining and evaluating learning outcomes; and awarding qualifications to learners.

c) Must be consistent with the objectives of the training program, clearly reflecting its contribution while also representing the representative requirements of employers and other stakeholders.

d) Must specify the exact level of proficiency and meet the standards for knowledge, skills, autonomy, responsibility, and required competencies for the corresponding level under the Vietnamese National Qualifications Framework.

e) Must ensure vertical articulation with the entry requirements of higher levels of training (if any), and create opportunities for horizontal articulation among programs at the same level, especially between programs within the same disciplinary group or field.

f) Must be fully and clearly specified in the learning outcomes of individual modules and components within the training program, and must be systematically implemented through links among modules and components.

g) Must be feasible, compatible with the program workload, such that the majority of learners who meet the entry requirements are capable of completing the training program within the standard duration.

h) Must reflect the attainment of the graduate attributes and competencies of VNU-HCM graduates.

6. The content and PLOs of the training program apply uniformly across all forms, modes of training, and categories of learners. For individuals who have already graduated from a different level or a different field,

the actual workload is determined on the basis of recognition or transfer of credits previously accumulated and exemption from modules in the prior training program.

7. The training program must be made public to prospective students before admission and at the commencement of the course; any changes or adjustments related to the training program are implemented in accordance with current regulations, are approved and announced before being applied to the relevant intake, without causing adverse impact on students.

8. The training program must provide a standard full-course study plan to guide students. The duration under the standard full-course study plan for regular training must comply with the timeframes specified in the National Education System Framework, while also ensuring that the majority of students complete the training program.

9. For training programs leading to a bachelor's degree, the program comprises 120-130 credits, designed for a standard duration of 3-4 years; for training programs leading to an engineering degree, the program comprises 150-160 credits, designed for a standard duration of 4-5 years.

10. The maximum duration for a student to complete the training program is 1.5 times the standard full-course study period. Special cases of extended training duration may be considered and decided by the Rector, but must not exceed 2 times the standard full-course study period. For students who have already graduated from an undergraduate program and have been granted credit exemptions, the maximum duration is determined based on the standard study period proportionally reduced by the exempted workload.

Article 3. Mode of training organization

1. IU uniformly applies credit-based training for all intakes and forms of training.
2. Credit-based training is a mode of organization by individual course module classes, allowing students to accumulate credits for each module and implement the training program according to their individual study plan, consistent with IU's teaching schedule.
3. Students who fail a compulsory module must retake that module or take an equivalent module as specified in the training program, or take a replacement module if the original module is no longer offered.
4. Students who fail an elective module must retake that module or may choose another elective module as specified in the training program.

Article 4. Form of training

1. IU delivers training in full-time mode for undergraduate programs leading to degrees conferred by IU and by partner institutions.
2. Teaching activities are conducted at IU's facilities; practical work, internships, field experience activities, and online teaching may be conducted off-campus.
3. Teaching activities are organized between 6:00 and 20:00 on weekdays from Monday to Saturday. The scheduling of activities specific to certain training programs shall be governed by separate regulations decided by the Rector.

Chapter II

PLANNING AND ORGANIZATION OF TEACHING

Article 5. Teaching and study plan

1. The teaching and study plan details the implementation of training programs by academic year and semester, consistent with IU's training activities.
2. The academic year plan sets out the key milestones of training activities for all training programs throughout the year, and is announced in a timely manner to relevant parties before the start of the academic year. One academic year has 2 main semesters (Semester 1 and Semester 2), each with a minimum of 15 teaching weeks. In addition to the main semesters, IU organizes a summer semester

(Semester 3) with a minimum of 7 teaching weeks.

3. The semester plan includes the class opening plan, mode of teaching and learning (in-person, online, or a combination), schedules, and examination timetables for modules offered during the semester for all intakes and programs. The semester plan must be developed and announced at least 2 weeks before the start of course registration, with all necessary information, ensuring convenience for students in developing and registering their study plans.

4. The timetable specifies the time, venue, and teaching and learning activities for each class across all intakes and programs. The timetable for regular module classes is distributed evenly across the weeks of the semester. Where intensive scheduling is necessary, the number of teaching hours for any given module must not exceed 15 hours per week and 4 hours per day.

Article 6. Organization of course registration

1. Before the start of each semester, the Undergraduate Training Office, faculties/departments, and academic counselors are responsible for notifying and guiding students to register for courses through the university's registration software system.

2. Students must register for classes in the modules they intend to study during the semester, including: new modules, certain modules not yet passed (for retaking), and certain modules already passed (for grade improvement, if applicable), based on the list of modules offered and the registration requirements for each module.

3. Course registration at IU is organized and conducted as follows:

a) Before each semester, the Undergraduate Training Office develops the semester plan, timetable, and course registration schedule, and notifies the faculties/departments for dissemination to students.

b) Faculties/Departments notify students of: the list of modules to be offered, the tentative teaching faculty for the semester, and the requirements for registering in those modules; the projected number of module classes for each module and the draft timetable; and the registration period.

c) Academic counselors are responsible for: advising students on developing appropriate study plans; organizing student course registration in accordance with the university's schedule and regulations; advising students on the number of credits and modules to register for each semester based on the training program and each student's academic record; reviewing and approving student registration. Academic counselors must hold at least one meeting with students per main semester.

d) Students complete course registration within the prescribed period.

e) For each student, the minimum registered workload in a main semester must be at least $\frac{2}{3}$ of the average semester workload under the standard study plan of the training program; the maximum registered workload in a main semester must not exceed $\frac{3}{2}$ of the average semester workload under the standard study plan.

f) First-year students do not need to register for modules. The Undergraduate Training Office will automatically register the standard study plan for students. Students from senior intakes are given priority to register first.

g) Students are not required to register for modules during the summer semester.

4. Additional registration, adjustment, and cancellation of module registration:

a) A registered module may be cancelled before the semester begins or after 1 week if the minimum class size is not met. Cancelled modules will not appear in the timetable and will not be charged.

b) Students may adjust their course registration during the first week of a main semester (Semester 1 and Semester 2). There is no adjustment week for the summer semester.

c) Requests for additional registration, adjustment, or cancellation of module registration after the first week of a main semester will be considered and tuition fees calculated based on the time the student submits the request.

5. Course registration results are managed and stored in the university's academic management software system.

Article 7. Organization of teaching and learning

1. Principles for organizing teaching and learning:

- a) To promote the professional competence and professional responsibility of the teaching staff, consistent with regulations on lecturers' working conditions;
- b) To promote the active role of students while upholding their responsibility, creating conditions and motivation for students to make academic efforts; maintaining academic discipline and improving the quality and effectiveness of training;
- c) To maintain mechanisms for internal inspection and supervision and a quality improvement system based on collecting and evaluating learner feedback.

2. Online teaching and learning:

- a) IU organizes online classes when complying with current regulations on the application of information technology in education management and online training; and when quality assurance measures and evidence of online class quality are in place to ensure that online delivery is not lower in quality than in-person delivery.
- b) The number of credits delivered online must not exceed 30% of the total program workload. In cases of natural disasters, complex epidemics, and other force majeure circumstances, online class organization shall follow guidance from the Ministry of Education and Training and VNU-HCM.

3. Responsibilities in teaching and learning organization:

- a) Faculties/departments are responsible for assigning lecturers to classes: lecturers for theoretical instruction, supervisors for laboratory, practical, internship, capstone, thesis, and other learning activities; ensuring the professional competence and professional responsibility of lecturers, consistent with the regulations on working conditions under IU's current charter.
- b) The Office of Quality Assurance and Examination is responsible for collecting learner feedback on quality assurance conditions and learning effectiveness for all classes, notifying results to module management units and the faculties/departments managing lecturers, and reporting to the Board of Rectors after each semester. Feedback results must be made public on the university's official website.
- c) Lecturers assigned to teach or supervise students are responsible for ensuring the quantity and quality of teaching as required, and for complying with IU's regulations on teaching activities.
- d) Students attending classes, participating in laboratory sessions, practical sessions, or when assigned internships, capstone projects, theses, and other learning activities, are responsible for completing all required content and meeting the study hours prescribed for each module; and for complying with the university's regulations, internal rules, and the professional requirements of lecturers. Students attending classes, laboratory sessions, practical sessions, or when assigned internships, capstone projects, theses, and other learning activities, are entitled to academic guidance and practical instruction, to be publicly informed of module assessment regulations and methods, and to appeal assessment results and other issues arising during their studies.

Article 8. Tuition fees

1. Students must fulfill their financial obligations as prescribed by the university for each semester of module registration.

2. The tuition fee for each module is calculated based on the number of credits of that module. The credit-based tuition fee for each module is determined by the Rector for each intake. Special program tuition fees are governed by separate regulations.

3. Tuition fee payment:

a) Students must pay tuition fees on time for all registered modules and/or modules with an official timetable. Students check tuition fees on the EdusoftWeb system and pay as notified by the university's Finance and Planning Office. Unpaid tuition amounts will be recorded as outstanding debts.

b) For main semester tuition, students must pay before mid-semester (as specifically notified each semester). Students who fail to pay on time will not be permitted to sit examinations and will not be allowed to register for modules in the following semester.

c) Where a student cannot complete tuition payment on time due to sudden hardship, the student must submit a written request for a payment extension to the Finance and Planning Office, stating the reasons, for consideration of permission to enter the examination hall, register for modules, and be assigned a timetable for the following semester.

4. Cases of unjustified tuition debt will be subject to disciplinary action in accordance with the Student Affairs Regulation and IU's other regulations.

Chapter III

ASSESSMENT OF LEARNING OUTCOMES AND CONFERMENT OF DEGREES

Article 9. Assessment and grading of modules

1. IU's official grading scale is the 100-point scale, rounded to the nearest integer. Other grading scales are for reference only. Conversion to other scales must be performed from the official scale.

2. For each module, students are assessed through a minimum of two component grades. Modules of fewer than 2 credits may have only one component grade. Component grades are assessed on a 100-point scale. The assessment method, form of assessment, and weighting of each component grade are specified in the approved detailed syllabus of each module. The proportion of component grades in the final result of a module is as follows:

- Practical work, assignments, essays: 20% - 40%;
- Mid-term examination: 20% - 40%;
- Final examination: 30% - 50%;

For practical modules, the proportion of component grades is as follows:

- In-semester practical scores: 70% - 80%;
- Final examination: 20% - 30%.

In cases of online teaching and learning, the proportion of component grades is as follows:

- Practical work, assignments, essays: 30% - 60%;
- Mid-term examination: 20% - 40%;
- Final examination: 20% - 40%.

The total percentage of all component grades in one module is 100%.

3. Online assessment may be applied when it ensures honesty, fairness, and objectivity equivalent to in-person assessment, and contributes no more than 50% of the module grade weighting. Online defense and assessment of capstone projects and graduation theses may carry a higher weighting when the following additional conditions are met:

- a) The assessment is conducted by an academic committee of at least 3 members;
- b) The online defense and assessment format is agreed upon by committee members and the student;

c) The proceedings of the online defense are fully audio and video recorded and archived.

d) In cases of natural disasters, complex epidemics, or other force majeure circumstances, online assessment may be implemented with a higher contributory weighting upon a decision approved by the Board of Rectors.

4. Module assessment is conducted in accordance with the approved detailed syllabus. Each module may have multiple assessments but only one mid-term examination and one final examination. During the summer semester, the university only organizes the final examination; mid-term examinations are the responsibility of the assigned teaching faculty. Cases where the mid-term or final examination is replaced by another format not specified in the module syllabus must be proposed by the Faculty/Department and approved by the Board of Rectors within 2 weeks (1 week for the summer semester) from the commencement of the module.

5. Mid-term and final examination papers must align with the module content specified in the program:

a) For modules taught to a single class, the examination is set by the lecturing staff.

b) For modules taught to multiple classes in the same semester by different lecturers, the Undergraduate Training Office (for common modules) or the Faculty/Department (for modules managed by the Faculty/Department) organizes the setting of a unified examination paper: one lecturer or a group of directly teaching lecturers is assigned to draft or consolidate the examination paper.

c) Examination papers are reviewed by the Faculty/Department and presented in the standard university format. The approver and the examination setter must be responsible for academic content and confidentiality of the paper.

d) Where multiple classes share a module, the final module examination must be organized at the same time with a unified paper.

e) Examination duration ranges from 45 to 120 minutes.

f) In special circumstances (natural disasters, epidemics), the final module examination follows regulations approved by the Board of Rectors.

6. Oral final examinations may be assessed by one or more lecturers. Oral examination results are announced publicly after each examination session. Where examiners cannot agree on a grade, they refer the matter to the Head of the Faculty/Department for a decision.

7. For capstone project and graduation thesis modules, assessment is conducted by a committee established by a Rector's decision with a minimum of 3 members. The Rector, based on proposals from the Faculty/Department and the Office of Scientific Research Management, regulates the awarding of bonus marks for publications related to the graduation thesis topic. Graduation internship, internships, field visits, and other practical or special modules are assessed according to the plan of the faculty/department managing the field of study, which must be clearly specified in the module syllabus.

8. The Rector regulates the preservation of examination papers, the grading process, and the storage of papers after grading.

9. Examination prohibition, absence from examinations, examination deferral, and late arrival:

a) For theoretical modules, students absent for more than 20% of the scheduled class time will be barred from sitting the final examination and must receive a grade of zero (0) for that module. For practical modules, students absent (with or without reason) for more than 20% of practical hours (lab sessions, experiments, seminars, etc.) and more than 50% of in-semester assessments will receive a grade of zero (0) for the practical component and the assessment component of that module. The list of barred students is prepared by the assigned teaching faculty and will be publicly posted at laboratories and at the Faculty/Department office managing students immediately upon conclusion of the module.

b) Students absent from laboratory sessions, internships, in-class assessments, or non-centralized examinations must submit an application with supporting evidence to the assigned teaching faculty within 1 working day following the absence (excluding Sundays and public holidays). If the reason is accepted, the student will be assigned a make-up session as arranged by the teaching faculty. If the student fails to submit or the reason is not accepted, a grade of zero (0) must be received for the sessions missed.

c) Students absent from a centralized final examination must submit an application with supporting evidence to the Faculty/Department managing the student within 5 days following the examination (excluding Sundays and public holidays). If the student fails to submit or the reason is not accepted, a grade of zero (0) must be received for that examination. Only after the Faculty/Department approves the application and the Undergraduate Training Office issues a decision acknowledging the absence as justified will the student be considered legitimately absent, with an Incomplete grade (Grade I) recorded on the transcript.

d) Students arriving 15 minutes or more late to an examination or assessment will not be permitted to enter the examination room and will be considered absent for that examination.

10. The module grade is calculated as the sum of all component grades multiplied by their respective weightings, rounded to the nearest integer. Module assessment classification is conducted according to the following levels:

a) Pass grades with differentiated levels, applicable to modules counted toward the grade point average:

Classification	100-Point Scale	Letter Grade	4-Point Scale
Excellent	90 to 100	A+	4.0
Very Good	80 to below 90	A	3.5
Good	70 to below 80	B+	3.0
Above Average	60 to below 70	B	2.5
Average	50 to below 60	C	2.0

b) Pass grades without differentiated levels, applicable to modules requiring only a pass and not counted toward the grade point average: 50 or above (Grade P).

c) Fail grades:

Classification	100-Point Scale	Letter Grade	4-Point Scale
Weak	40 to below 50	D+	1.5
Poor	30 to below 40	D	1.0
	Below 30	F	0.0

d) Special cases using letter grade classifications not counted toward the grade point average:

I: Incomplete grade due to approved deferral of examination or assessment;

X: Incomplete grade due to insufficient data;

WH: Grade for a module approved for exemption with credit recognition.

PC: Grade for examination prohibition.

11. Conditions and procedures for requesting an Incomplete grade (Grade I):

a) Students must satisfy the following conditions to receive a Grade I:

- Must have attended classes, mid-semester assessments, and module-related activities such as laboratory sessions, practical work, and assignments;
- Must have paid tuition for the module;
- Must not already hold a Grade I for the module being requested (each student may only request a Grade I for a given module once);

- The module for which a Grade I is requested must not be among those without an organized examination, such as practical modules, laboratory modules, physical education, internships, in-class assessments, graduation theses, graduation internships, etc.;
- Must have been absent from the final examination due to force majeure circumstances (bereavement in the family, hospitalization, etc.);
- Must not be under examination prohibition, late for an examination, academic warning, suspension of studies, temporary cessation, or disciplinary action involving examination prohibition under this Regulation.

b) Procedures for requesting a Grade I:

- Requesting a Grade I before the examination date: the student submits an application with valid supporting evidence to the teaching faculty. Based on the teaching faculty's opinion and the Faculty/Department's consent, the Undergraduate Training Office considers issuing a decision granting the student a Grade I.
- Cases involving a university dispatch for examination, official duty, or student exchange: the student submits an application with the dispatch decision from the Board of Rectors or the admission letter from the partner institution, to the Undergraduate Training Office.
- Emergency cases (bereavement, hospitalization): the student or a family member submits a Grade I application to the Undergraduate Training Office with supporting documents (hospitalization requires a hospital admission certificate, prescription, medical record book, social insurance card, etc.); in cases of bereavement (grandparent, parent, sibling) the student must submit a copy of the death certificate within 5 days of the missed examination. Based on the teaching faculty's opinion and the Faculty/Department's consent, the Undergraduate Training Office considers issuing a Grade I decision.
- In cases of natural disasters or epidemics, the deadline for submitting evidence to request a Grade I may be extended to 30 days or as notified by the Undergraduate Training Office.
- Other special cases: the student submits an application to the Faculty/Department; the Faculty/Department submits a proposal for the Board of Rectors' approval, after which it is submitted to the Undergraduate Training Office for update.

c) Procedures for clearing a Grade I: students do not need to re-register for modules with a Grade I in the following semester, but only need to submit an application to sit the Grade I clearing examination within 1 week after the examination schedule is announced. Within the subsequent 1-year period, if the student does not sit the examination to clear the Grade I, the Grade I is automatically converted to a grade of zero (0). Where the faculty/department does not offer the module for Grade I clearing, the student is granted an extension as requested by the faculty/department. If a student who holds a Grade I for a module subsequently re-registers for that module, the prior Grade I is automatically converted to zero (0).

12. A module may be granted an exemption when it is deemed equivalent to another module that the student has passed and accumulated during their studies.

- a) The total credits considered for exemption must not exceed 50% of the total credits of the training program.
- b) Cases eligible for module exemption and recording of an exemption grade: Students who have passed an equivalent/replacement module at the same level and type of training at IU during their studies (automatically assessed for exemption based on the list of equivalent/replacement modules); students who have completed certificates or have completed political education and NPD modules; students who have passed an equivalent module at the same level and type of training at another institution, and IU has verified the equivalence on the basis of comparing the two institutions' training programs (modules considered equivalent must have a duration equal to or greater than the IU module's duration, and with content that is at least 70% similar).

c) Students wishing to have a module recognized as equivalent, replacement, or exempted from study or examination must submit an application and provide full supporting evidence. The consideration of equivalence or replacement of certain modules will be proposed by the Undergraduate Training Office based on the list of equivalent or replacement modules submitted by Faculties/Departments and approved by the Board of Rectors.

d) When a module is recognized as equivalent or exempt, the Undergraduate Training Office will record an exemption grade (WH) to distinguish it from grades accumulated through examination. If students wish to obtain a higher grade, they must re-register for that module.

e) The grade of an equivalent module at IU (due to a change in the training program) is not counted toward the SGPA but is counted toward the CGPA. In cases of transfer from another institution to IU, preserved grades and equivalent module grades are not counted toward either the SGPA or the CGPA.

f) Grades of equivalent modules are not used in the calculation for scholarship consideration.

g) Credits of equivalent modules are not counted toward the number of credits passed in a semester, but are counted toward the total accumulated credits up to that point.

h) For students who transfer between fields or programs, the transcript will reflect grades for all modules from the first year (whether or not they belong to the current intake-field/specialization program). However, the CGPA will be calculated based on the modules in the current program, and the remaining modules will not be counted in the cumulative grade point average.

13. Retaking modules, re-examinations, and grade improvement:

a) Students with a failing module grade must re-register for that module as stipulated in Article 3 of this Regulation; the grade from the most recent attempt is the official module grade. The grades from all attempts are fully recorded in the student's academic data.

b) Students who have already passed a module may re-register to retake it for grade improvement as per university regulations. The highest grade will be the official module grade. The grades from all attempts are fully recorded in the student's academic data.

14. Notification of module assessment results:

a) No later than 2 weeks after the examination date for both mid-term and final examinations, the teaching faculty must complete the steps for publishing grades on the academic management software system as required, and submit 2 official grade sheets (signed by the teaching faculty and the Faculty/Department): one copy is retained by the Faculty/Department and one by the Undergraduate Training Office. For modules without an examination date, the deadline for submission is the end of the final examination week of the semester.

b) If errors are found after grade sheets have been submitted for mid-term or final examinations, the teaching faculty submits a Grade Adjustment Form (signed by the teaching faculty and the Faculty/Department Head) to the Undergraduate Training Office, prints and submits the adjusted grade sheet as in the original submission, within a maximum of 2 months after the end of the semester.

c) Faculties/Departments notify students of grade results for modules in each semester. The Undergraduate Training Office is responsible for notifying grades for modules shared across Faculties/Departments.

15. Grade appeal (re-marking):

a) For in-class grades and mid-term examination grades, students directly contact the teaching faculty when they have queries for grade checking. The teaching faculty accepts inquiries for a maximum of 1 week from the date grades are announced. If the re-check results in a change, the teaching faculty announces this to students and sends the grade adjustment to the Undergraduate Training Office on the prescribed form.

b) For final examination grades, students have the right to request a re-mark. Applications for re-marking of final examination grades must be submitted to the Undergraduate Training Office or the Faculty/Department within 2 weeks of the date grades are announced. After this period, students lose the right to request re-marking. Re-mark results will be announced within 1 week after the deadline for receiving re-mark applications.

16. Grade improvement:

- a) For modules already passed but where grade improvement is desired, students must re-register and pay tuition fees as required.
- b) Depending on actual teaching conditions for each module, the university will specify which modules are not eligible for grade improvement (if any).
- c) Improved module grades are not used in calculating the semester GPA for scholarship consideration, but are counted in both the semester GPA and the CGPA.

Article 10. Assessment of learning outcomes by semester and academic year

1. Students' learning outcomes are assessed after each semester or academic year, based on the results of modules within the training program requirements that the student has studied and for which grades have been recorded, according to the following criteria:

- a) Total credits of modules the student has not passed in a semester, in an academic year, or accumulated from the start of the course;
- b) Total credits of modules the student has passed since the start of the course (accumulated credits), including modules granted exemption or credit recognition;
- c) The average grade of all modules the student has studied in a semester (semester GPA), in an academic year (annual GPA), or cumulatively from the start of the course (CGPA), weighted by the number of credits for each module using the official module grade.

2. The semester GPA and CGPA are calculated using the formula:

$$A = (\text{sum of } a_i * n_i) / (\text{sum of } n_i)$$

Where: A is the SGPA or CGPA; a_i is the grade of module i; n_i is the number of credits of module i; N is the total number of modules.

- a) Grades for supplementary English, Physical Education, and National Defense and Security Education modules are not counted toward the semester, annual, or cumulative GPA. Grades of exempted or preserved modules are not counted in the SGPA or CGPA.
- b) The SGPA is used to consider scholarships, commendations, advanced study, concurrent enrollment in multiple programs or institutions, and is calculated based on the first attempt grade for each module in the corresponding semester. The CGPA is used to classify academic performance, apply academic management decisions, and rank graduation, and is calculated based on the highest grade among all attempts.
- c) The addition of bonus marks for awarded scientific research projects to the SGPA and CGPA is determined by the Rector and widely announced to students.

3. Letter grades not specified in clause 10, Article 9 are not counted in any GPA. Modules not within the training program requirements are not counted in any student performance assessment criteria.

4. Students are classified by academic performance according to their semester GPA, annual GPA, or CGPA as follows:

Classification	100-Point Scale	Letter Grade	4-Point Scale
Excellent	90 to 100	A+	4.0
Very Good	80 to below 90	A	3.5

Good	70 to below 80	B+	3.0
Above Average	60 to below 70	B	2.5
Average	50 to below 60	C	2.0
Weak	40 to below 50	D+	1.5
Poor	30 to below 40	D	1.0
	Below 30	F	0.0

5. Students are ranked by year level based on the total credits accumulated since the start of the course (N) and the average number of credits per year under the standard study plan (M), specifically:

- a) First-year level: $N < M$;
- b) Second-year level: $M \leq N < 2M$;
- c) Third-year level: $2M \leq N < 3M$;
- d) Fourth-year level: $3M \leq N < 4M$;
- e) Fifth-year level: $4M \leq N < 5M$.

6. During their studies, students may request the university to issue a transcript. Students must submit an application and pay fees as stipulated by the university. The maximum processing time for a transcript is 5 working days. Transcript information includes results for all modules.

Article 11. Academic management under the credit system

1. At the end of each semester, students are placed on academic warning based on the following conditions:

- a) The total number of failing credits in the semester exceeds 50% of the registered workload, or the total accumulated failing credits from the start of the course exceeds 24;
- b) The student's CGPA falls below 35 on the 100-point scale, or the CGPA for 2 consecutive semesters falls below 40 on the 100-point scale;
- c) The student has not paid tuition, health insurance premiums, and other fees as required by the university.

2. Students are subject to expulsion in the following cases:

- a) Academic warning has been issued more than 2 times;
- b) The study period has exceeded the maximum limit as stipulated in clause 10, Article 2 of this Regulation;
- c) The student has continuously suspended studies for more than 2 main semesters or has suspended beyond the permitted period;
- d) The student has voluntarily left their studies for one or more main semesters or has not completed course registration procedures;
- e) Violation of academic regulations, disciplinary rules, and other university regulations to the extent of expulsion;
- f) Other special cases as decided by the Rector.

3. Cases of expulsion due to more than 2 academic warnings may be provisionally readmitted if the following conditions are satisfied:

- a) The student has been reviewed and accepted by the managing Faculty/Department.
- b) The student has completed all required procedures at the managing Faculty/Department on time and has registered for study in the semester under consideration.
- c) Special cases will be considered by the Rector upon proposal from the Undergraduate Training Office, with a decision on provisional readmission. After provisional readmission, if no further

violations occur in the following semester, the student will be automatically officially readmitted.

4. Academic counselors are responsible for monitoring students' academic progress and reporting to the Faculty/Department to issue academic warnings each semester, in order to help students with poor performance adjust their approach and devise an appropriate study plan to graduate within the maximum permitted time.
5. Each year, the university conducts academic management processing in 2 rounds: after Semester 1 and after the summer semester. The results of the summer semester are combined with those of Semester 2 of the corresponding academic year for academic management review. The Undergraduate Training Office prepares data and lists of students to be reviewed. The final decisions are made at a meeting of the Academic Management Council with representatives from the faculties and departments managing students. The outcomes of academic management processing (academic warnings, expulsion, other disciplinary measures) will be communicated to students, faculties, and departments managing students, and sent to the student's place of permanent residence.
6. Academic results accumulated in cases where a student is expelled are preserved for 3 years from the date of the expulsion decision.
7. The calculation, assessment, and ranking of student conduct scores are carried out in accordance with the regulation on student conduct assessment.

Article 12. Learning outcomes standards and recognition of foreign language proficiency

1. Students must meet the English language entry requirement before beginning their major courses. Students admitted to IU will take an entrance English test in the TOEFL iBT or IELTS format and will be placed in classes at the corresponding level. Students may submit a valid international English certificate as recognized by the university to replace the entrance English test. The English entry requirements and conversion between English proficiency scales and accepted certificates are determined by the Rector.
2. The English language exit standard required for graduation recognition is determined by the Rector based on proposals from the Academic and Training Council, and must not be lower than the standard stipulated by VNU-HCM and the Ministry of Education and Training.
3. To be recognized as meeting the foreign language exit standard, students must submit international English certificates as required. The Undergraduate Training Office submits to the Rector for a decision recognizing students as meeting the foreign language exit standard through multiple rounds during the academic year, valid for the entire course for each student.

Article 13. Graduation internship and graduation thesis

1. To register for the graduation internship module, students must satisfy the prerequisite module conditions, prior module conditions, or minimum accumulated credit requirements specific to each field of study. Students participating in the graduation internship must be on the list approved in the university's decision recognizing students assigned to internship. The prerequisite module conditions, prior module conditions, or minimum accumulated credit requirements must be publicly announced on the faculty and department website.
2. To register for the graduation thesis (GT) module, students must satisfy the graduation thesis conditions specific to each field of study, have accumulated a minimum of 90% of the program credits excluding the GT module, and be recognized as having met the foreign language exit standard. Students participating in the GT must be on the list approved in the university's decision recognizing students assigned to work on the GT.
3. The Rector determines: the conditions for assigning students to carry out a GT; the form and duration of GT implementation; the requirements for GT supervisors; the establishment of the assessment committee and the form of GT assessment; the maximum number of students each GT supervisor may supervise simultaneously.

Article 14. Recognition of learning outcomes and credit transfer

1. Learning outcomes accumulated by a student from a different level of training, a different field of study, a different training program, a different intake, or a different educational institution may be reviewed by the university for recognition and conversion to credits of modules in the currently enrolled training program.
2. The Rector issues a decision to establish an academic committee upon proposal from the Faculty/Department, to consider recognition and credit transfer on the basis of comparing learning outcomes, content and workload, module assessment methods, and quality assurance conditions for program implementation at the following levels:
 - a) Recognition and transfer by individual module;
 - b) Recognition and transfer by module group;
 - c) Recognition and transfer by entire training program.
3. Modules accumulated in the first undergraduate training program that are recognized for credit transfer must satisfy the following conditions:
 - a) The module belongs to a current regular undergraduate training program, with results classified as a pass according to Article 9 of this Regulation.
 - b) The module has equivalent content and a credit value equal to or greater than the corresponding module in the current regular undergraduate training program.
4. Modules not eligible for credit transfer: graduation internship, graduation thesis, and modules that do not meet the conditions in clause 3 of this Article.
5. The university is responsible for issuing a certificate of academic results to the student upon completion of the study process as required.

Article 15. Graduation recognition and conferment of degrees

1. Students are considered and recognized as having graduated when they satisfy all of the following conditions:
 - a) Have accumulated all required modules, credits, and other compulsory components as stipulated by the training program, and have met the program's learning outcomes;
 - b) Have a cumulative GPA of at least average for the entire course;
 - c) Have met the foreign language exit standard, NPD and PE certificates, and completed conditional modules as required by VNU-HCM and IU (including political education classes and civic activities);
 - d) At the time of graduation review, are not subject to criminal prosecution or are not under disciplinary suspension of studies;
 - e) Have fulfilled all responsibilities and obligations in accordance with officially promulgated university regulations and charters.
2. Students who meet the graduation requirements will have the Rector issue a decision recognizing their graduation and conferring a degree or a temporary graduation certificate within 3 months from the date the student satisfies all graduation conditions and completes their obligations to the university.
3. Graduation ranking is determined based on the cumulative GPA for the entire course as stipulated in clause 4, Article 10 of this Regulation; the graduation ranking for students with an Excellent or Very Good cumulative GPA will be reduced by one level if they fall into any of the following cases:
 - a) The volume of modules retaken (due to failure, not counting modules retaken for grade improvement) exceeds 5% of the total credits stipulated for the entire program;
 - b) The student has been disciplined at the level of a warning or above during the period of study.
4. Students who have exceeded the maximum study period but have not yet met graduation requirements due to incomplete NPD or PE certificates, or have not met the foreign language exit standard, may complete the remaining conditions within 3 years from the date of withdrawal and request graduation review.

5. Students who do not graduate will be issued a certificate of modules accumulated in the university's training program.
6. The process and procedures for graduation review and recognition are as follows:
 - a) Each academic year, IU establishes a Graduation Review Council for students in 2 rounds: in May and in September. Based on the graduation conditions, the Graduation Review Council compiles the list of eligible graduates and proposes the Rector to issue a decision recognizing the list of graduating students.
 - b) During the degree issuance process, students are issued a temporary graduation certificate. This certificate is valid from the date of issue until the date of receiving the degree, and does not substitute for the graduation degree.
7. Accumulated academic results for students who do not graduate are preserved and recognized in accordance with regulations of the Ministry of Education and Training and VNU-HCM.

Chapter IV

OTHER REGULATIONS APPLICABLE TO STUDENTS

Article 16. Leave of absence and withdrawal from studies

1. Students may apply for a leave of absence and preservation of academic results in the following cases:
 - a) Called up to serve in the armed forces;
 - b) Called upon by a competent authority to represent the nation in international competitions or events;
 - c) Illness, maternity, or accident requiring long-term treatment, with certification from a medical institution as stipulated by the Ministry of Health;
 - d) Other personal reasons, provided the student has studied for at least 1 semester at the institution and is not subject to expulsion or disciplinary review. The Rector considers and decides on each specific case.
2. The period of leave of absence for personal reasons under point d, clause 1 of this Article must be counted toward the official study period stipulated in clause 10, Article 2 of this Regulation.
3. For students withdrawing from studies for personal reasons, except those subject to expulsion or disciplinary review, those wishing to return must apply for admission as new candidates. Special cases are considered and decided by the Rector.
4. Students may only take a leave of absence upon a decision by the Rector. Students may not suspend studies for more than 2 consecutive main semesters, and the total permitted suspension period is a maximum of 4 main semesters for the entire course with a training duration of 4-6 years.
5. Students who have suspended studies and wish to resume at the university must complete the enrollment procedures by the university's stipulated deadline, at the latest 4 weeks before the start of the semester.
6. For students who suspended studies for military service, when carrying out re-enrollment procedures, they must submit the discharge decision or a certificate of completion of duties.
7. To carry out procedures for leave of absence, withdrawal from studies, resumption of studies, preservation, and recognition of academic results, students must complete the prescribed form (provided by the Undergraduate Training Office) and submit it to the Undergraduate Training Office. These requests will be processed within no more than 7 days from receipt of the application.

Article 17. Transfer of field of study, location, institution, and mode of study

1. Students may be considered for transfer to a different program or field of study when the following conditions are met:

- a) Not currently a first-year or final-year student, not subject to expulsion review, and sufficient remaining study time as stipulated in clause 10, Article 2 of this Regulation;
 - b) The student meets the admission requirements of the target program or field of study in the same intake year;
 - c) The receiving unit has sufficient quality assurance conditions and has not exceeded its training capacity for the target program or field as stipulated by the Ministry of Education and Training;
 - d) The consent of the heads of the academic units managing the target program/field and of the Rector has been obtained.
2. For students enrolled in international joint programs wishing to transfer to another joint program within the same field of study, the following conditions must be satisfied:
- a) Not currently a first-year or final-year student, not subject to expulsion review, and sufficient remaining study time as stipulated in clause 10, Article 2;
 - b) Not currently in the phase of achieving the required foreign language proficiency;
 - c) The target field of study still has available training slots;
 - d) Meets the admission requirements of the target program/field in the same intake year;
 - e) The consent of the heads of the academic units managing the target program/field and of the Rector has been obtained.
3. Procedures for field transfer: students submit an application for field transfer review from Week 5 to Week 8 of a main semester, or from Week 1 to Week 2 of the summer semester. The processing deadline for field or program transfer is no more than 15 days from receipt of the application.
4. The maximum permitted study period for students who transfer to a different field or program is the maximum course completion period stipulated in clause 10, Article 2 of this Regulation.
5. Students may be considered for transfer to another institution when the following conditions are met:
- a) Not currently a first-year or final-year student, not subject to expulsion review, not currently under disciplinary action of a warning or above, and sufficient remaining study time as stipulated in clause 10, Article 2;
 - b) The student meets the admission requirements of the target program/field in the same intake year at the receiving institution;
 - c) The receiving institution has sufficient quality assurance conditions and has not exceeded its training capacity for the target program/field as stipulated by the Ministry of Education and Training;
 - d) The consent of the Rector of the institution the student is leaving and the Rector of the receiving institution has been obtained.
6. Procedures for institution transfer:
- a) The student must submit an application for institution transfer, with supporting evidence, to seek the written consent of the Rector of the receiving institution, specifying any additional conditions (if any);
 - b) If approved by the receiving institution, the student submits the application and all documents to the institution they are leaving. The Rector of the sending institution issues a decision permitting the transfer, provides a transcript, and authenticates documents for the student as required by the receiving institution;
 - c) The Rector of the receiving institution issues a decision accepting the student, recognizing previously accumulated modules based on proposals from the managing Faculty/Department;
 - d) The processing deadline for institution transfer is no more than 15 days from receipt of the application.
7. The maximum permitted study period for students who transfer to another institution is the maximum course completion period stipulated in clause 10, Article 2 of this Regulation.

Article 18. Student exchange and cooperation in training

1. Student exchange programs are activities involving the acceptance of incoming students or the sending of outgoing students for short-term study (for credit or non-credit purposes) or cultural exchange according to programs designed between IU and partner institutions.
2. Procedures for participating in student exchange programs and related regulations are implemented in accordance with IU's Regulations on the Management and Operation of Student Exchange Programs.
3. In training cooperation between IU and other educational institutions, with mutual recognition and assessment agreed upon by the Rectors of both institutions, the number of credits accumulated by students at the partner institution must not exceed 25% of the total program workload.
4. Auditing students: Individuals who wish to supplement knowledge in certain modules and who satisfy the requisite personal and academic standards may be considered by the university to become auditing students:
 - a) Auditing students will pay 100% of the tuition fee for each module attended.
 - b) Auditing students will be issued a certificate of attendance and academic results for registered modules upon completion if they fully comply with the university's training and academic regulations and the requirements of the module lecturer.
 - c) Auditing students may not complete capstone projects, graduation theses, or be considered for graduation to receive a degree; foreign auditing students are not assisted with visa procedures.

Article 19. Concurrent enrollment in two programs

1. Under the credit-based training mode, students may register for modules from another program or field of study when the university's conditions permit, but will only receive official benefits and be considered for graduation from the second program upon successful registration for the second program as stipulated in clause 2 of this Article.
2. Students may register for a second program at the earliest when they have been classified at the second-year level in the first program. At the time of registration, students must satisfy the following conditions:
 - a) Academic performance and admission scores satisfying one of the following two conditions:
 - CGPA classified as Good or above, and meeting the quality threshold of the second program in the year of admission; or
 - CGPA classified as Average, and meeting the admission requirements of the second program in the year of admission.
 - c) The field of study of the second program must differ from that of the first program;
 - d) No difference in the form and level of training between the two programs.
3. If, during concurrent enrollment in two programs, the CGPA for the first program falls below Average or is placed under academic warning, the student must discontinue the second program from the following semester; the student will be removed from the list of those registered for the second program.
4. The maximum permitted study period for students concurrently enrolled in two programs is the maximum period stipulated for the first program under clause 10, Article 2 of this Regulation. When studying the second program, students will have equivalent or replacement modules from the first program recognized.
5. Students may only be considered for graduation from the second program if they have met the graduation conditions for the first program and have registered for the second program at least 2 years before the date of graduation review for the second program.

Article 20. Handling of student violations

1. Students who commit fraud in examinations, assessments, or evaluation of learning outcomes will be disciplined for each module in which the violation occurred, in accordance with the regulations of the current High School Graduation Examination Regulation issued by the Ministry of Education and Training, except for cases under clause 2 of this Article.

2. Students who sit examinations on behalf of others, or who ask others to sit examinations on their behalf, will be disciplined with a suspension of studies for 1 year for the first violation, and expulsion for the second violation.
3. Students who use forged documents, diplomas, or certificates as admission requirements or graduation requirements will be expelled; any degree already conferred will be revoked and annulled.

Chapter V

IMPLEMENTATION

Article 21. Development and implementation of training regulations

1. The Undergraduate Training Office is responsible for advising the Board of Rectors on the development, updating, promulgation, and implementation of training regulations, based on the advice of the Academic and Training Council and internal management regulations.
2. Faculties and departments are responsible for disseminating and guiding students on the university's regulations and those related to the learning process, and on regulations concerning students' obligations and rights at the beginning of each course.
3. The Office of Quality Assurance and Examination is responsible for monitoring teaching quality, collecting feedback from learners, and advising the Board of Rectors on quality assurance in training.
3. The Legal Inspection Office is responsible for organizing internal inspection and audit of compliance with this Regulation and other tasks related to training.
4. All staff, lecturers, employees, and related units must comply with this Regulation in undergraduate teaching activities. Academic counselors are responsible for monitoring academic progress and status, providing timely advice, guidance, and warnings to learners.
5. Where necessary, the Rector may decide to amend or supplement certain provisions to suit actual circumstances.

Article 22. Reporting, archiving, and public disclosure of information

1. Before December 31 each year, the Undergraduate Training Office reports to the Ministry of Education and Training and VNU-HCM on data concerning newly enrolled, graduated, withdrawn, and currently enrolled students for the year, projected graduates for the following year, and graduates who have found employment within 12 months; classified by type of intake, field of study, intake year, and form of training.
2. Documents related to training activities must be archived and kept safely by the Undergraduate Training Office in accordance with regulations issued by the Ministry of Education and Training:
 - a) Admission decisions, original grade sheets, graduation recognition decisions, and degree issuance registers for students are archival documents kept permanently;
 - b) Other documents related to enrollment and training are stored and preserved throughout the training process;
 - c) The destruction of enrollment and training documents beyond the archiving period is carried out in accordance with current state regulations.
3. The university publicly discloses on its official website, no later than 45 days before the commencement of training:
 - a) The academic regulations and related training management regulations;
 - b) Decisions to open fields of study and other training decisions ensuring full compliance with regulations;
 - c) Quality assurance conditions as stipulated by the Ministry of Education and Training;
 - d) Evidence that training programs meet the program standards issued by the Ministry of Education and Training;
 - e) Admission announcements in accordance with the current admission regulations.
